Boycotting HP is hypocritical. If Cambridge really believe in BDS than they should stop using ALL their high tech, telephones and computers. To single out HP is lip service to Muslims in Cambridge and BDS antisemitic supporters. The Cambridge incident may open the door for assessment of what they teach in US public schools. Isaac Barr MD

Hello,

Thank you for your email. So far, I have not yet seen an actual draft of the proposed resolution asking the City to cease purchasing HP equipment and supplies. I understand there's been a great deal of concern in the community about this matter – yet I must underscore that this will only appear on the City Council's April 23 agenda if one or more City Councilors sponsor it. We will not know if it is on the agenda until either a City Councilor publicly declares that they'll be sponsoring this (to my knowledge, this has not happened), or until the agenda is finalized by the Clerk's Office and posted online this Thursday evening around 5:30 pm. I can, at the very least, confirm that *I* am not a sponsor of such a resolution.

There have been numerous op-eds, emails, and social media posts condemning the City Council for rushing this to a vote without adequate opportunities for the public to weigh in, or even giving people a chance to read the resolution. Some people have condemned the City Council for seemingly being on the brink of passing this resolution, or for seemingly being on the brink of rejecting it. Neither of these scenarios is accurate. While I understand the passion behind this matter, I must clarify that we do not yet actually have a resolution or policy order in front of us, there has been absolutely no debate about this amongst the City Councilors, and the City Council will not have an opportunity to take this up for consideration unless and until a resolution is sponsored by at least one of us and introduced at a public meeting. At this point, I am not yet certain if such a resolution will be introduced or not.

I appreciate your reaching out and sharing your views on this. I am currently reading up on this issue to be better informed, I am reviewing all the emails and letters coming in about this issue, and I am reaching out to our representatives in Congress to seek their input on an issue that is more international than municipal in scope. Should this matter end up on before the City Council – either on April 23 or at a later date – I will look forward to engaging in a thoughtful discussion and debate with my colleagues on the Council and then seeing how to best resolve this matter in a way that allows everyone to feel they have had a fair chance to be heard. Thank you.

E. Denise Simmons

As a mature Bostonian physician I am pissing in my pants to hear that you want to boycott HP because it is dealing with in Israel and BDS will bring to surrender of Israel to Palestinian demands, get on the ships and go some where to allow a Palestinian state instead of Israel. I presume that each of you has at least one mobile phone. 99% of the chips inside are made by Intel Israel in the Negev. You should immediately stop using mobile phones. Regardless of brand all computers have Intel chips. I presume that in Cambridge you drive new model cars. These new cars, all of them, have crash prevention produced by Mobil eye Israel. Do not buy a new car. Yes, cardiac stents are produced in Jerusalem. Here is a list of companies that do business in Israel ready to be boycotted. Isaac Barr MD

List of multinational companies with research and development centres in Israel

From Wikipedia, the free encyclopedia

There are over 250 R&D Centers in Israel owned by multinational companies.[1]

Google development center in Matam, Haifa

Broadcom development center in Herzliya

Alcatel-Lucent development center in Azorim technology park

BMC Software development center in Tel Aviv

Company	Country	Sector	Major acquisitions and investments
